

KB EVENT SUSTAINABILITY POLICY

VISION

To provide an excellent service operated to the detriment of nothing or no-one.

PRINCIPLES

Our approach to business is guided by commitments to the following principles; Equality, Transparency, Integrity, Consistency, Continuous Review and Continuous Improvement.

IMPORTANT ISSUES

The nature of our business, freight, faces many challenges and opportunities. Due to the direct impact our operations have on the planet, we have prioritised the following issues as those that need to be addressed: Climate change, water conservation, health and safety, employee welfare.

OUR ABILITY AND DUTY TO ACT

- We believe in the necessity to prevent pollution and commit to meet and surpass all relevant environmental legislation, regulations and other requirements. Working closely with STW, the environment agency and the local emergency services, our Pollution Incident Response Plan, protects our local environment, local residents and our employees.
- We believe in the necessity to recycle and commit to the minimising our consumption of resources and the level of waste sent to landfill.
- We are committed to ensuring the best procedures and controls are in place to provide protection from hazardous substances.
- We believe in staff involvement and staff training to ensure inclusivity and commitment to our Policies and ethos among all members of the KB team.
- We encourage suppliers to operate within our commitments to sustainability and will actively seek alternative supply chains where this is not possible.

OBJECTIVES

We commit to:-

1. To reduce the environmental impact associated with truck movements by adhering to strict maintenance procedures.
2. To reduce all unnecessary mileage by planning and costing projects effectively.
3. To continue offering HVO Bio fuel and/or cleaner green alternatives to our client base.
4. To reduce the impact of solid waste production from site activities by continuing to encourage storage clients to recycle sets, rather than re-build.
5. To continue to encourage e-correspondence at all times, and reduce printing and postage.

6. To only procure new vehicles that comply with the latest EC emission and noise specification
7. To control, monitor and reduce the fuel consumption and emission levels of all vehicles.
8. To Encourage all employees to have consideration for the environment.
9. To ensure that vehicle weights remain within legal restrictions, limiting damage to highways and the environment.
10. To encourage road safety and good driving practise by providing a high standard of training and monitoring.
11. To Encourage greater fuel economy, so reducing emission levels, by providing a high standard of driver training.
12. To ensure that our vehicle servicing contractors carry out repairs and servicing in an environmentally considerate manner and ensuring that all waste vehicle oil disposal is carried out by a licensed operator specialising in waste oil disposal.
13. To return all used tyre casings to the supplier for disposal in an approved and environmentally satisfactory manner.
14. To Take all reasonable steps to ensure that any hazardous goods carried are properly packaged in accordance with relevant national and international law.
15. To recycle used paper and other material wherever it is possible and practicable to do so.
16. As they become known, the company will consider other environmentally advantageous practices, and take account of local authority and community representations.

Signed:

Stuart McPherson

Managing Director
